Table of Allotments,) RM - _____
FM Broadcast Stations)
(Auburn, Alabama))

To: The Chief, Allocations Branch

RECEIVED

JUL 5 - 2000

FCC MAIL ROOM

PETITION FOR RULE MAKING

Comes now AUBURN NETWORK, INC., (hereafter "Petitioner"), pursuant to Section 1.401 of the Commission's Rules, and respectfully petitions the Commission to amend the FM Table of Allotments, 47 C.F.R. 73.202(b), to allocate FM Channel 263A to Auburn, Alabama, as that community's second local FM service.

Proposal of Petitioner:

<u>City</u>	<u>Channel Numbers</u>	
	<u>Present</u>	<u>Proposed</u>
Auburn, Alabama	249A	249A, 263A

No. of Copies rec'd 0+4
List A B C D E
MMB

In support of this proposal, the following information is herewith submitted for consideration:

Auburn is an incorporated community located in Lee County in east central Alabama, approximately 160 kilometers southeast of Birmingham, Alabama. The city population is 33,830 and the county population is 87,146 ^{1/}. It is the largest city in Lee County and is the home of Auburn University. Adoption of this proposal will provide Auburn with its second commercial FM broadcast service.

Attached hereto and made a part of this petition is a Technical Exhibit in support of the requested allotment. Based on the information contained therein, it appears that the requested channel could be allocated to Auburn, in full compliance with the minimum distance separation requirements of Section 73.207(b) of the Commission's Rules, without the imposition of a site-restriction.

Petitioner is the licensee of WANI(AM), which is licensed to the contiguous community of Opelika, Alabama. If this proposal is adopted, Petitioner will promptly apply for authority to construct and operate a new FM broadcast station at Auburn, Alabama. If a construction permit is granted, Petitioner will promptly construct and operate the proposed station.

^{1/} Population figures from the 1990 U.S. Census.

In accordance with Section 1.52 of the Commission's Rules and Regulations, I hereby certify that I have examined the foregoing Petition for Rule Making and the attached Technical Exhibit and that both are true and correct to the best of my knowledge and belief.

WHEREFORE, it is respectfully requested that the instant petition be granted and that the FM Table of Allotments, Section 73.202(b), be amended as requested herein.

Respectfully submitted,

AUBURN NETWORK, INC.

AUBURN NETWORK, INC.

INTRODUCTION

This Technical Exhibit supports the petition of AUBURN NETWORK, INC., seeking to amend the FM Table of Allotments, Section 73.202(b) of the Rules, by allocating FM Channel 263A to Auburn, Alabama, as that community's second local FM channel.

ALLOCATION

A study was performed using the computerized **SEARCHFM** frequency search program and the current FCC/NTIS database to determine if Channel 263A could be allocated in compliance with the minimum distance separation requirements of Section 73.207(b) of the Commission's Rules. The study included all applicable co-channel, adjacent-channel and IF separations. The results of that study indicate that Channel 263A may be allocated to Auburn in full compliance with Section 73.207(b), without the imposition of a site-restriction.

Contemporary Communications

**PHONE (662) 846-1787 □ FAX (708) 575-6539
P. O. BOX 1787 □ CLEVELAND, MS 38732**

The "area-to-locate" for Channel 263A is indicated on Exhibit A, attached hereto. The exhibit depicts the required separation arcs from all pertinent co-channel and adjacent channel stations and allocations. As indicated, there is ample area in the vicinity of Auburn in which to locate a transmitter site. Assuming maximum Class A facilities (6 kw @ 100 meters above average terrain), a transmitter site at any location within the "area-to-locate" would enable the proposed station to provide adequate city-grade (70 dBu) coverage to the entire city, in full compliance with Section 73.315(a) and (b).

CONCLUSION

The proposed change in the table of allotments will not create a short-spacing to any existing station, pending application or vacant allotment, and will not require the reallocation of any station, pending application or vacant allotment.

A copy of the separation study for Channel 263A is attached hereto as Exhibit B and made a part of this report (only those stations and channels sufficiently close for concern are noted therein).
